

LEEKNIT 4022

Knitting oil without splash

Characteristics

Type of product	combination of filtration paraffin and emulsifier and anti corrosion and anti splash
Ionogenity	nonionic/anionic
Appearance	transparent light yellow
Consistency	liquid
Flash point	160°C
pH 10%	7/5
Viscosity (40°C/ CST)	22
Density	0.86

Properties

- Decrease the friction between needle
- Decrease the depreciation and heating of machine
- Don't disturb the coating of systems
- Decrease the possibility of oils splash
- Washout easily from the fabric cause of the strong emulsification power
- Anti corrosion effect

Spezial remarks

Storage stability 12 months

Product solidifies with continuing frost, use it after heating and stirring.
