

**LEERITUN 38/SM**

Spinning Lubricant For Woolen and Semi-Worsted System.

**Characteristics**

Composition	Mixture of mineral oil, emulsifier and antistatic
Ionic Type	Nonionic
Appearance	Light brown
Consistency	Liquid
PH	6.5-7

**Properties**

- Increase fiber-fiber cohesion , reduces fiber to metal friction
- Prevents corrosion
- No effect on dye shade
- Water soluble and excellent removability
- Does not cause yellowing and bad adour in fiber and yarn production
- For removable oil from fabric ,does not use the thermal fixation
- Reduces hairiness in all stage of yarn production

**Application**

Soluble in water easily and have a white and stable emulsion.

**Guide recipe**

Woolen spinning system

1 -2.5% Leeritun 38/SM                      dilution: 1:8 – 1:20

Semi worsted spinning

0.1 – 0.4 % Leeritun 38/SM                      dillution : 1:8 – 1:12

If is necessary, 0.1-0.3% Leestatic AL can be used.

**Storage**

Storage stability                      12 months

Kept at room temperature, don't storage below 5<sup>0</sup> C.
