

LEESOFT PW250

Disperse poly ethylene wax

Characteristics

Type of product	disperse wax poly ethylene
Ionogenity	nonionic
Appearance	liquid Brownish
Consistency	liquid
PH	8-10

Properties

- Extremely soft handle
- Stable in front of washing
- Usable with anionic and cationic and nonionic another materials.
- Dimensional fixation and Prevent crease mark in delicate and fabrics.
- Usable and stable in heat
- For permanent finishing for cotton, viscose, wool ,synthetic fibers and blending of them in continues and discontinues methods

Application

Dissolving method Leesoft PEA25 dissolving in water with any ratio.

Guide recipe

- Exhaust Process

Leesoft PEA 25	: 1 - 4
Temperature	: 40 – 50 °c
Time	: 20 – 30 min
PH	: 5

- Folard system

Leesoft PEA 25 : 10 – 40 g/l

Special remarks

Storage stability at least 12 months
Preservation it from frost. keep it at **20 °c** .
