

LEEWASH JET

Nanionic detergent without foam

Characteristics

Type of product alkyl aril poly glycol ether
Ionogenity nonionic
Consistency white viscous liquid

Properties

- without foam
- Suitable for disizing and bluejean process
- Increase the hydrophilic effect
- Extraordinary wetting effect at all temperature ranges
- Wetting agent at dyeing process for any fiber (it's not suitable for reactive dye and Hydron-Blue)
- It can be used for jet and over flow and dyeing-bobbin machine

Application

Dissolving method dissolving in water with any ratio until 50⁰C.

For bleaching and kier	Leewash JET	1 – 2 g/l
For increase the hydrophilic effect	Leewash JET	1 – 2 g/l
For blue jean process	Leewash JET	2 – 4 g/l
For disizing process	Leewash JET	2 – 4 g/l

Special remarks

Storage stability 12 months
The products sensitive to frost.
